"Applying the Danish Code of Conduct for Research Integrity to Your Research"

18 May 2022

Description: This course examined the Danish Code of Conduct for Research Integrity that guides research practices of scientists, researchers and their collaborators. The course briefly introduced the principles of research integrity, dwelled on the basic standards for conducting responsible research - from the planning phase to the dissemination of results, and also shortly introduced the current administration for misconducts. The course was based on the Danish Code of Conduct for Research Integrity (Ministry of Higher Education and Science, 2014), that was accepted by all Danish Universities. The course included cases and supplementary material to illustrate research integrity through examples participants can work with and think about. The course was a mix of lectures and group-based workshops, including discussions pertaining to the participants' own challenges.

Course responsible: Professor Dorte Hammershøi, Associate Professor Antonia Scholkmann, Professor Ina Drejer, Associate Professor Trine Fink, and Professor Per Halkjær Nielsen

Lecturers: Professor Dorte Hammershøi, Department of Electronic Systems, Associate Professor Antonia Scholkmann, Department of Learning and Philosophy, Professor Ina Drejer, Aalborg University Business School, Professor Per Halkjær Nielsen, Department of Chemistry and Bioscience, Susanne Andersen, Grants & Contracts, Charlotte Høj Mariendahl and Karsten Kryger Hansen, AUB.
